Esperion Therapeutics to Present at 33rd Annual J.P. Morgan Healthcare Conference

Presentation and Webcast on Monday, January 12, 2015 at 8:30 a.m. Pacific Time/11:30 a.m. Eastern Time

ANN ARBOR, Mich.--(BUSINESS WIRE)-- Esperion Therapeutics, Inc. (NASDAQ: ESPR), an emerging pharmaceutical company focused on developing and commercializing first-in-class, oral low-density lipoprotein cholesterol (LDL-cholesterol) lowering therapies for the treatment of hypercholesterolemia and other cardiometabolic risk markers, today announced that president and chief executive officer, Tim M. Mayleben, will present at the 33rd Annual J.P. Morgan Healthcare Conference in San Francisco, CA on Monday, January 12, 2015 at 8:30 a.m. Pacific Time/11:30 a.m. Eastern Time.

A live, listen-only webcast of the presentation can be accessed on the investor relations section of the Esperion website at www.esperion.com. A webcast replay of the presentation will be available approximately one hour after completion and will be archived on the Company's website for 90 days following the event.

Esperion's Commitment to Cardiometabolic Disease

Esperion is committed to improving the lives of patients with cardiometabolic diseases. The Esperion team leverages its understanding of, and experience with, key biological pathways to discover and develop innovative therapies for the treatment of patients with hypercholesterolemia who have uncontrolled cholesterol levels despite the use of currently available therapies. Esperion has assembled a portfolio of programs including one product candidate in late-stage clinical evaluation (ETC-1002) and two pre-clinical product candidates.

About Esperion Therapeutics

Esperion Therapeutics, Inc. is an emerging pharmaceutical company focused on developing and commercializing first-in-class, oral, LDL-cholesterol lowering therapies for the treatment of patients with hypercholesterolemia and other cardiometabolic risk markers. ETC-1002, Esperion's lead product candidate, is a unique, first-in-class, orally available, once-daily small molecule designed to lower LDL-cholesterol levels and avoid the side effects associated with therapies currently available for lowering LDL-cholesterol. ETC-1002 is being developed for patients with hypercholesterolemia, including those with a history of statin intolerance.
